- NO 23 216 SPEEDER size 19 x 21

Limited space prevents a normal spanner from being turned over. With SPEEDER and its change-over mechanism this is no problem!

Long, protruding bolts are child's play for the SPEEDER. Time is saved as the SPEEDER need not be removed and replaced repeatedly.

The 25° off-set head eases use, for example when working close to a wall.

When space is limited, especially when placing the spanner in position, the SPEEDER range should be your choice.
